Differentiating Crohn's disease from intestinal tuberculosis

Kedia S *et al.* Differentiating CD and ITB

Saurabh Kedia, Prasenjit Das, Kumble Seetharama Madhusudhan, Siddhartha Dattagupta, Raju Sharma, Peush Sahni, Govind Makharia, Vineet Ahuja

Abstract

Differentiating Crohn's disease (CD) and intestinal tuberculosis (ITB) has remained a dilemma for most of the clinicians in the developing world, which are endemic for ITB, and where the disease burden of inflammatory bowel disease is on the rise. Although, there are certain clinical (diarrhea/hematochezia/perianal disease common in CD; fever/night sweats common in ITB), endoscopic (longitudinal/aphthous ulcers

Abstract. With the changing epidemiology of **Crohn's disease** (CD) **and intestinal tuberculosis** (ITB), we are in an era where the difficulty facing physicians in discriminating between the two **diseases** has increased, **and** the morbidity **and** mortality resulting from a delayed diagnosis or misdiagnosis is considerably high.

2011年1月28日 - **Differentiating intestinal tuberculosis** from **Crohn's disease** (CD) is an important clinical challenge of considerable therapeutic significance. The problem is of greatest magnitude in countries where **tuberculosis** continues to be highly prevalent, **and** where the incidence of CD is increasing.
