STATEMENT

The article titled "Assessment of Moroccan Physician Knowledge and Practices Regarding Maternal Obesity's Impact on Childhood Obesity: Implications for Prevention and Intervention" elucidates the findings of a study conducted in close partnership with the Association des Médecins [ACHAS]. All respondents engaged in the survey are active constituents of this professional association. This collaborative initiative was established to uphold rigorous ethical and professional standards in the research process.

It is imperative to acknowledge that this research has secured requisite ethical approval from the Association of Physicians [ACHAS], which functions as the designated ethical review board overseeing this investigative inquiry. All procedural aspects were meticulously executed in alignment with the ethical principles set forth by the association, thereby safeguarding the research's integrity and upholding the rights of participating individuals.
