TO THE EDITOR
CORRECTION

In this article[1], a correction note is to be added. The corresponding author received a mail from Dr. Claudio De Simone sharing his concern about a probiotic formulation VSL#3 which is mentioned in this review article. Dr. Claudio wishes us to publish a corrigendum. It is an earnest request that please incorporate the following correction note and publish a corrigendum regarding the same.
Correction note:
This review article includes references to several studies that investigated a probiotic formulation formerly marketed as VSL#3 which is currently, generically referred to as the “De Simone Formulation”. It is important to note that the current product marketed as VSL#3 differs from the De Simone Formulation as also stated by the federal court of Maryland in the Civil Action No. TDC-15-1356. They are distinct probiotic formulations with different compositions and characteristics. Currently, the De Simone Formulation is accessible under Vivomixx (in Europe) and Visbiome (in the United States) brand names.
