

**Supplementary Table 1 Risk factors with odds ratios and *P* value for postprandial distress syndrome (B1a) in the adults born preterm**

<b>Risk factors</b>	<b>Odds ratios (95%CI)</b>	<b><i>P</i> value</b>
Postprandial distress syndrome: B1a		
Physical function score <sup>1</sup>	0.83 (0.69-0.97)	0.02
Ability to participate in social roles and activities score <sup>1</sup>	0.75 (0.59-0.90)	0.01
Pain interference score <sup>1</sup>	1.24 (1.03-1.52)	0.02
Moderate to severe anxiety (Generalized Anxiety Disorder-7 items)	5.8 (0.95-33.17)	0.04
Antidepressant	4.9 (1.07-21.43)	0.03
Tobacco use	5.3 (0.94-27.06)	0.04
University Level of education	0.07 (0.01-0.53)	0.02

<sup>1</sup>As evaluated through the Patient-Reported Outcomes Measurement Information System-29 items questionnaire.

The statistical method is Univariate analysis.
