State of the art management of diabetic macular edema

Ramin Nourinia, Masoud Soheilian

Abstract

Macular edema following ⁵diabetic retinopathy is one of the ocular complications associated with diabetes, and it is the leading cause of visual loss in the active young and middle aged population in developed countries. While all patients with diabetes particularly those ⁸⁹with diabetic retinopathy are at increased risk of developing eye complications, early detection ¹²and timely intervention may prevent or delay loss of
