

PEER-REVIEW REPORT

Name of journal: *World Journal of Gastroenterology*

Manuscript NO: 84966

Title: Raf kinase inhibitor protein combined with phosphorylated extracellular signal-regulated kinase has significant clinical and prognostic value in gastrointestinal stromal tumor

Provenance and peer review: Unsolicited Manuscript; Externally peer reviewed

Peer-review model: Single blind

Reviewer's code: 06140461

Position: Peer Reviewer

Academic degree: MD, PhD

Professional title: Assistant Professor, Research Associate

Reviewer's Country/Territory: United States

Author's Country/Territory: China

Manuscript submission date: 2023-04-24

Reviewer chosen by: AI Technique

Reviewer accepted review: 2023-04-27 08:35

Reviewer performed review: 2023-05-04 01:25

Review time: 6 Days and 16 Hours

SPECIFIC COMMENTS TO AUTHORS

The title reflect the main subject of the manuscript. The abstract summarize and reflect the work described in the manuscript. The key words reflect the focus of the manuscript. The manuscript adequately describe the background, present status and significance of the study. The manuscript describe methods in adequate detail. The research objectives achieved by the experiments are used in this study. The manuscript interpret the findings adequately and appropriately, highlighting the key points concisely, clearly and logically. The findings and their relevance to the literature are stated in a clear and definite manner. The discussion is accurate and d it discuss the paper’s scientific significance and relevance to clinical practice sufficiently. The diagrams and tables are sufficient, good quality and appropriately illustrative of the paper contents. The manuscript meet the requirements of biostatistics. The manuscript cite appropriately the latest, important and authoritative references in the introduction and discussion sections.

SPECIFIC COMMENTS TO AUTHORS

This study is very interesting. The authors proposed to analyze the relationship between the RKIP, P-ERK, and P-MEK proteins in GIST with clinicopathological characteristics and prognosis of this disease. The tables and figures help the readers to make a more understanding of the study. The whole manuscript is well drafted; however, some concerns have been noted including: 1. The manuscript required a minor revision, both for the language and the format. 2. The limit of the study should be discussed.
