Traumatic cataracts in children and its visual outcome

Mehul A Shah, Shreya M Shah, Aarti H Chaudhry, Lalchand R Gupta

Abstract

AIM: To review results of traumatic cataracts in children.

METHODS: Only those pediatric patients who fitted in the definite inclusion criteria were considered for study. They were further examined for any kind of co- morbidities because of trauma, operated upon for traumatic cataracts with intra ocular lens implantation. Amblyopia if present was treated. All were re-examined at the
