<input type="checkbox"/> Grade D: Fair	<input type="checkbox"/> Grade D: Rejected	<input checked="" type="checkbox"/> No	<input checked="" type="checkbox"/> Minor revision
<input type="checkbox"/> Grade E: Poor		BPG Search:	<input type="checkbox"/> Major revision
		<input type="checkbox"/> The same title	
		<input type="checkbox"/> Duplicate publication	
		<input type="checkbox"/> Plagiarism	
		<input checked="" type="checkbox"/> No	

### COMMENTS TO AUTHORS

This is a mainly well-written review, novelty is relatively limited. Nicely documented with Figures and Tables. Comments; 1. please discuss the CD40/CD40L pathway in greater details (research focus by Danese et al) 2. The enhanced CV risk is controversial in IBD so this part of the abstract, core tips and paper should be downgraded 3. Therapeutic targets and possibilities could be discussed in greater details 4. please include a practical conclusion/summery highlighting better the take home points for the clinical practice in the discussion
