### **SPECIFIC COMMENTS TO AUTHORS**

This paper reports a case of pneumonia and epilepsy caused by hypereosinophilic syndrome. The cause of hypereosinophilic syndrome is unknown, and its clinical symptoms are atypical. There are few clinical related studies on hes. This manuscript has certain value. The article fully introduces the research background, and the data and icons can explain the content of the article. The viewpoint given in this paper is that the focus of HES treatment is to determine the appropriate dose and duration of PSL and LEV treatment. This case report can be used as a reference for the diagnosis and treatment of similar cases.
