This is to confirm that I, Biplob Banerjee, have conducted the statistical review of the study titled "Semaglutide for the Management of Diabesity- The Real-world Experience" (Manuscript no: 91832). I am currently working as a Technical Advisor at International Centre for Research and Development, Dhaka, Bangladesh. I am also working as visiting Professor at Doctor Zafor Nursing College, Bangladesh. My academic background includes Masters in Public Health, Masters in Social Science (Clinical Social Work), Post-graduation Diploma in Population Science, Masters in Business Administration (Management Information System) and Post-graduation in Laws. I have been involved in the data management and analysis of numerous national and international research projects.

The statistical review of this study encompassed various aspects of study design, data collection methods and data analysis. I employed rigorous statistical techniques to ensure the validity and reliability of the study's findings. My expertise in biostatistics played a pivotal role in enhancing the scientific rigor of the research. This statement attests to my professional competence in applying statistical methods to health-related research, contributing to the credibility and the accuracy of the study results.
