Role of Hospitalization for Inflammatory Bowel Disease in the Post-Biologic Era

Celine R. Seriano, Charleston R. Powell, Michael V. Chiorriani, Videt V. Semiran

Abstract
Treatment for inflammatory bowel disease (IBD) often requires specialized care. While much of IBD care has shifted to the outpatient setting, hospitalizations remain a major site of healthcare utilization and a sizable proportion of patients with inflammatory
Inflammatory Bowel Disease: New Therapeutic Options in the ...
Background: Inflammatory bowel diseases are chronic bowel disorders the causes of which have not been fully elucidated, though they all share an immunological basis. They have an important impact on both quality of life of the patient and on healthcare services. Method: The incorporation of biological agents against tumour necrosis factor (TNF) alpha some 15 years ago represented a revolution ...
