2015-4-16 · Dieulafoy's lesions maintain an abnormally large caliber despite their peripheral, submucosal, location. Dieulafoy's lesions typically present with severe, active, gastrointestinal bleeding. About 75% of lesions are located in the stomach, most commonly close to the gastroesophageal junction, but lesions can occur in duodenum and esophagus.

### Endoscopic Full-Thickness Resection of Colorectal Lesions ...

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC6624659>

**Endoscopic full-thickness resection** (EFTR) is an emerging technique for the **treatment** of various conditions for which classic **endoscopic resection** techniques have failed or were considered to be at high risk for perforation. The **full-thickness resection** device (FTRD) is an over-the-scope system which allows a single-step EFTR.

### Safety and efficacy of over-the-scope clip-assisted full ...

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC6379745>

Feb 16, 2019 · Core tip: Over-the-scope clip-assisted **endoscopic full thickness resection** (eFTR) of subepithelial tumors is a novel **endoscopic** technique, but has not been extensively studied in duodenal tumors. We present a **case** of a duodenal carcinoid tumor resected with clip-assisted eFTR that was complicated by bleeding. We explore the safety and efficacy of this procedure in light of the available ...

## Endoscopic Management of Dieulafoy's Lesion

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC4381137>

Mar 27, 2015 · INTRODUCTION. A **Dieulafoy's** lesion in the gastrointestinal (GI) tract, initially described by the French surgeon Dieulafoy as exulceratio simplex in 1898, is a rare but important cause of GI bleeding.<sup>1,2</sup> It is defined as a vascular abnormality consisting of a large-caliber, persistent, tortuous submucosal artery. The artery fails to taper as it reaches the mucosa and hence has a diameter of 1 ...
