Adenocarcinoma arising from heterotopic pancreas at the third portion of the duodenum

Nobutada Fukino, Takatsugu Oda, Kenji Mimatsu, Youichi Kuboi, Kazutoshi Kida

Abstract

A 62-year-old Japanese man presented to our hospital with a history of weight loss of 6 kg in 4 months. Imaging examinations revealed a tumor located on the third portion of the duodenum with stenosis. We suspected duodenal carcinoma and performed pancreas-preserving segmental duodenectomy.

Adenocarcinoma arising from a heterotopic pancreas at the third portion of the
