## Scientific significance of the conclusion in this manuscript

- Grade A: Excellent
- Grade B: Good
- Grade C: Fair
- Grade D: No scientific significance

## Language quality

- Grade A: Priority publishing
- Grade B: Minor language polishing
- Grade C: A great deal of language polishing
- Grade D: Rejection

## Conclusion

- Accept (High priority)
- Accept (General priority)
- Minor revision
- Major revision
- Rejection

## Re-review

- Yes
- No

## Peer-reviewer statements

- Peer-Review: Anonymous
- Onymous

## Conflicts-of-Interest

- Yes
- No

### SPECIFIC COMMENTS TO AUTHORS

This is a very rare disease and there are many issues to learn about. However, the author needs to clarify a few issues: 1. Why was this baby born by Caesarean section instead of natural birth? 2. Was this child the mother’s first baby? How old was the mother? Did she take any medications during pregnancy? 3. The baby’s weight at birth was only 2400g. Was the baby healthy? Why was the baby taken to the doctor after 14 days of having jaundice? 4. Why wasn’t MRI performed at admission but 10 days after? Was there any treatment within these first 10 days? 5. The author should discuss the mother’s alloimmunity. 6. Liver biopsy and MRI images are not consistent with PH. Did the author think this was a case of liver cell destruction due to drugs or toxins? 7. What does the author recommend to prevent this condition?
