SPECIFIC COMMENTS TO AUTHORS

This is a well-documented case of TH in a 2-year child affected by SARS-CoV-2 infection. The case overall adds little to literature, but I think that it can have a good educational value. Some comments: - please distinguish between SARS-CoV-2 infection and COVID-19 all throughout the text (e.g., abstract: COVID-19 infection, should be SARS-CoV-2 infection - and there are several other cases in the paper). - do the Authors have information on the specific variant of SARS-CoV-2 infecting the child? - when was the case recorded and documented? - if possible, please expand on the novelty of the case.
