The study is aimed to investigate the relationship between non-alcoholic fatty liver disease and major cardiovascular and cerebrovascular events (MACCE) in subgroups using a nationally representative US inpatient sample. The title is “Sex and Racial Disparities in NAFLD-Related Cardiovascular Events: National Inpatient Sample Analysis (2019)”. 1. Several factors influence the outcome of the study. Please discuss these. 2. Please review the literature and add more details in the discussion section. 3. Please add more details of the limitations of the study. 4. What is the new knowledge of the report? 5. Please recommend to the readers “How to apply this knowledge?".
