ESPS PEER-REVIEW REPORT

Name of journal: World Journal of Gastrointestinal Endoscopy

ESPS manuscript NO: 27445

Title: Potassium-competitive acid blocker versus proton pump inhibitor for the healing of gastric ulcers induced by endoscopic submucosal dissection: a pilot prospective randomized controlled study

Reviewer's code: 02441611

Reviewer's country: China

Science editor: Jing Yu

Date sent for review: 2016-05-30 16:33

Date reviewed: 2016-06-02 23:10

COMMENTS TO AUTHORS

This article is relatively novel. There is no report on the drug used to treat the post-ESD ulcers. some problems need to be explained: 1. The experiment still needs further improvement, because there is lack of the evidence of Vonoprazan and lansoprazole in the patients with extensive and poor metabolizers. 2. There were no complications such as bleeding in the enrolled patients in both group. Which is related to case screening or drug efficacy? It need to be further clarified. 3. Because vonoprazan did not show superiority to lansoprazole with regard to ulcer healing after ESD and lansoprazole is more cost-effective, further study is needed to explore the necessity of using vonoprazan for the treatment of post ESD ulcers. 4. This discussion indicates that vonoprazan might prove to be superior to PPIs in extensive metabolizers. Is this speculation or logic deduction? The results need further clarify.

COMMENTS TO AUTHORS

This is the first study concerning the effect of P-CAB on ulcer healing after ESD compared to PPI. In this regard, this is a valuable study. Major comments: 1) Please explain how the sample size was decided. 2) Please explain how to randomize the patients (e.g. envelope method). 3) Are authors planning to conduct a large-scale RCT in the future? In the present study it seems that P-CAB is not always necessary after ESD.

COMMENTS TO AUTHORS

Originally, anticoagulant, antiplatelet agents, and steroid user should be removed to arrange conditions without complications in comparing ulcer healing, but please add that it ended up in the study with combination of them to discussion. This results are thought to be very useful article from the terms of cost effective.
