Stressors During Childhood and Adolescence and Their Psychological Sequelae. The most widely studied stressors in children and adolescents are exposure to violence, abuse (sexual, physical, emotional, or neglect), and divorce/marital conflict (see Cicchetti 2005). McMahon et al. (2003) also provide an excellent review of the psychological consequences of such stressors.

Moral Injury - PTSD: National Center for PTSD
https://www.ptsd.va.gov/professional/treat/cooccurring/moral_injury.asp
May 19, 2020 - There is a great deal of overlap between moral injury and posttraumatic stress disorder (PTSD). Both begin with an event that is often life threatening or harmful to self or others. Guilt and shame are core features of moral injury and are also symptoms of PTSD.
