SPECIFIC COMMENTS TO AUTHORS

This expert consensus is very well written. In this consensus relevant domestic and foreign literature on definition, epidemiology, pathogenesis, clinical manifestation, diagnostic criteria, and treatments of myofascial pain syndrome. The consensus is intended to normalize the diagnosis and treatment of myofascial pain syndrome and be used by first-line doctors, including pain physicians to manage patients with myofascial pain syndrome. It will make the clinician better understand of the treatment of the myofascial pain syndrome. Minor comments: 1. The manuscript requires an editing according to the journal's guidelines. 2. Some language polishing should be revised.
