COMMENTS TO AUTHORS

Major points: -The linguistics of the article should be revised by a native English speaker -The selection criteria of the manuscripts included in this review article should be explained. The methodology of article selection is an important part of review article preparation process--The reference hormone levels that may cause ED are not defined in the manuscript. -The second Princeton guidelines about CVD and ED should be included in the part discussing CVD, ED and CKD -The prevalence percentages such as in patients younger than 50 years old and MMAS study should also be included in the review in addition to text -The repetitive parts about atherosclerosis, CVD, CKD that are found both in patho-physiology and co-morbidities part should be redacted and revised -The treatment of ED in CKD patients should be sub-categorized in to two parts: pre and post kidney transplant patients. In addition the text should be revised in order to be in accordance with EAU guidelines, step by step therapy. (Life style modifications, PDE 5 inhibitors etc...). Minor points -An author contributions part should be added to the manuscript - The incidence and prevalence of ED in the chronic kidney disease should also be mentioned in the abstract. -The publications that include

COMMENTS TO AUTHORS

This is an excellent review of important clinical challenges pertaining to ED in chronic kidney disease. Overall, the article is well-written. There are minor grammar issues that need to be addressed.

COMMENTS TO AUTHORS

This is a good review of the subject. I have no strong critiques other than stylistic ones.
