

SUPPLEMENTARY MATERIAL

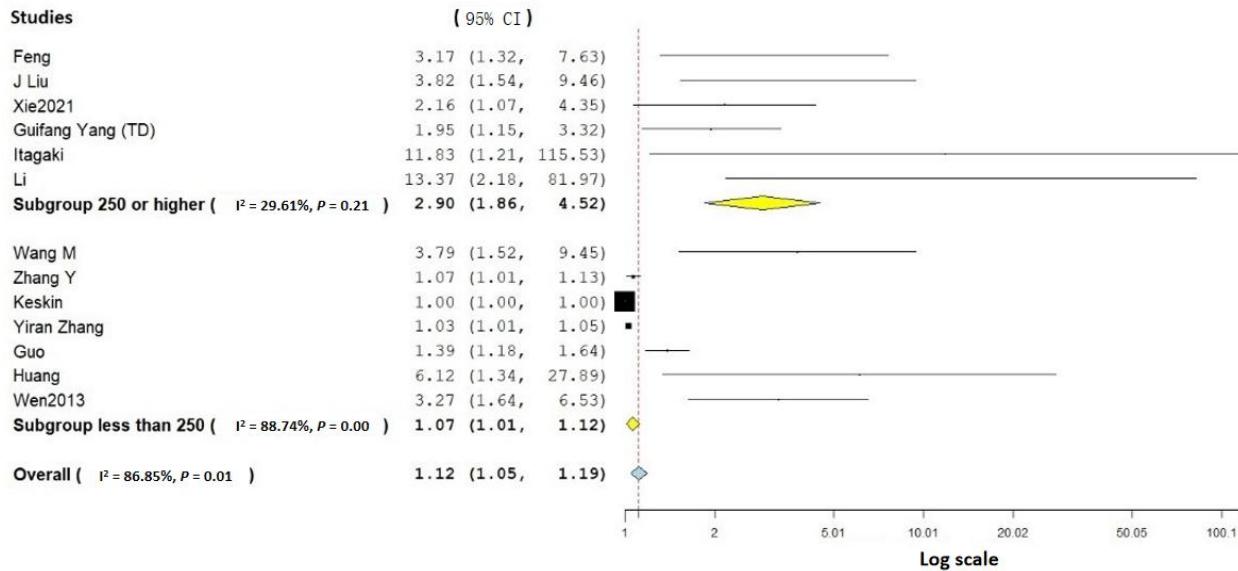

Supplementary Figures

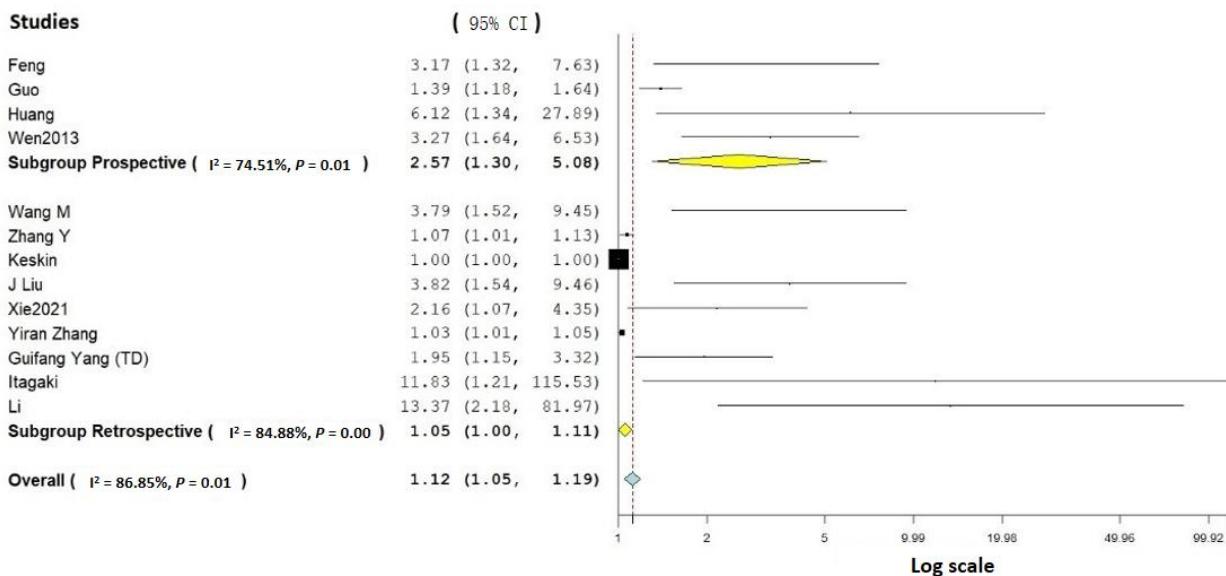

Supplementary Figure 1 Publication bias by visual inspection of funnel plot.

Supplementary Figure 2 Adjusted effect size of mortality with elevated D-dimer-subgroup analysis by age.

Supplementary Figure 3 Adjusted Effect Size of mortality with Elevated D-dimer-Subgroup analysis by sample size.

Supplementary Figure 4 Adjusted effect size of mortality with elevated D-dimer-subgroup analysis by study types.

Supplementary Table

Supplementary Table 1 Critical appraisal of included studies

Ref.	Ref.	Type of study design	Sample representative of target population and selected from same population	Is sample size adequate (> 20)?	Study subjects and settings described in detail	Exposure measure s in valid and reliable way?	Were confounding factors identified?	Were strategies used (multivariable regression/matching) to deal with confounders?	Were groups free from outcome s at the start of study	Were outcomes measured in a valid and reliable way?	Was long-term follow-up time reported clearly?	Was follow-up complete for all patients or were there reasons to loss of follow-up? Were reasons mentioned clearly?	Were Appropriate statistical tests were used to report results?
