

INFORMED CONSENT STATEMENT

Name of Journal: *World Journal of Clinical Cases*

Manuscript NO: 70306

Manuscript Type: Case Report

A Case of Ectopic Peritoneal Paragonimiasis Mimicking Tuberculous Peritonitis

Jung Woo Choi, Chang Min Lee, Seong Je Kim, and Se In Ha, Ji Woon Kwak, Hyun Chin Cho, Chang Woon Ha, Woon Tae Jung, Ok Jae Lee

Department of Internal Medicine, Gyeongsang National University Hospital, Gyeongsang National University School of Medicine

Informed consent statement: A patient was not required to give informed consent for the study because this is a study that analyzed data retrospectively at a specific point that had already been completed in the treatment process. In the entire research process, including clinical data collection, analysis, and manuscript preparation, the possibility of infringing on the human rights of the subject patient is judged to be minimal, and the confidentiality of the subject patient's personal information has been thoroughly maintained. Therefore, it is considered that the procedure for obtaining written consent from the subject patient can be omitted.

Sincerely,

Chang Min Lee
