JOURNAL EDITORIAL BOARD COMMENTS TO AUTHORS

1. Based on the title of this study, “Sarcopenia-associated factors in middle-aged and elderly male type 2 diabetes patients and their correlation with bone mineral density”, the second part is important but the result descriptions lack detail information, particularly for the sections “BMD in diabetic patients with SP” [table 4] and “Correlation between BMD of different body parts and body function in diabetic patients” [Table 5]. Please improved these sections. 2. In addition, the table 4 are better to present with correlation curves with distribution of data dots in the figures.
