Advanced pancreatic ductal adenocarcinoma - Complexities of treatment and emerging therapeutic options

Diwakarla C *et al.* Advanced pancreatic ductal adenocarcinoma

Chandra Diwakarla, Katherine Hannan, Nadine Hein, Desmond Yip

Abstract

Pancreatic ductal adenocarcinoma is a devastating disease with a poor prognosis regardless of stage. To date the mainstay of therapy for advanced disease has been chemotherapy with little incremental improvements in outcome. Despite extensive research investigating new treatment options the current practices continue to utilise fluorouracil or gemcitabine containing combinations. The need for novel therapeutic
