Development of a real-time endoscopic image diagnosis ...

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC6783454>

Oct 08, 2019 · The present data illustrates that the AI system we developed is an ideal tool to **use** in **colonoscopy**. Another expected benefit of the developed system is to **improve** the quality of **colonoscopy**. Corley et al. reported that a 1.0% **increase** in the **adenoma detection rate** expected a 3.0% decrease in the risk of PCCRC 6. However, the quality of ...

Computer-aided diagnosis offers a promising solution to reduce variation in **colonoscopy** performance. Pooled miss **rates** for polyps are as high as 22%, and associated interval colorectal cancers after **colonoscopy** are of concern. Optical biopsy, whereby in-vivo classification of polyps based on enhanced imaging replaces histopathology, has not been incorporated into routine ...

Artificial intelligence and colonoscopy: Current status ...

https://www.researchgate.net/publication/330265273_Artificial_intelligence_and...

Jan 09, 2019 · CAD-CNN models for **colonoscopy** could assist **endoscopists** in detecting polyps and performing optical diagnosis [17][18][19]. These AI-based models have great potential for increasing the **adenoma** ...

Emerging artificial intelligence applications in ...

<https://www.wjgnet.com/2689-7164/full/v1/i1/6.htm>

CAD analysis has the potential to aid **adenoma detection further**. Urban et al , used a different and representative set of 8641 hand-labeled images from screening colonoscopies handled among over 2000 patients. They tested the models on 20 **colonoscopy** videos with a whole duration of 5 hours.
