**SPECIFIC COMMENTS TO AUTHORS**

However the review topic is interesting there are several comments and recommendations: - Abstract looks like an introduction rather than a summary including background, methods and conclusion of your search. - SLE is a severe and an important complication of KFD, you discussed it well however update is required ( see as example, Tarabichi S, et al. Kikuchi-Fujimoto disease and systemic lupus erythematosus—an enigmatic association for clinicians and pathologists: Case report and short literature review. Romanian Journal of Rhinology. 2022 Jan;12(45):11-21. - Also you miss some cases reported for SARS-cov vaccine related KFD - You provide a title of (comment) at the end of the article which is vague, and if you can conclude your unique information and conclude your recommendation would be better.
