COMMENTS TO AUTHORS

This review focuses on ultrasound imaging of living donor liver transplantation. The authors provide a summary of the relevant surgical techniques and common variations. They then provide an illustrated guide to both normal and abnormal doppler ultrasound findings in the intra-operative and post-operative period. This is an impressive and comprehensive review of the topic. Relevant references are cited, and the numerous figures are very illustrative. Beyond minor weaknesses related to English/grammar, no major limitations to publication are identified.
