SPECIFIC COMMENTS TO AUTHORS

This is a case report dealing with consumption of high amount of concentrated star fruit juice by a 78-year-old male and treatment of acute kidney injury by haemodialysis. Is calcium oxalate crystal deposit the only reason to cause kidney injury? Is it possible for hypertension and diabetes to cause kidney injury as well? The authors should discuss this issue. In Table 1, the normal range and unit of each index should be provided. The serum creatinine value in page 2 is different from that in Table 1. The authors should double check.

SPECIFIC COMMENTS TO AUTHORS

1 authors should discuss about why the AKI is definitely induced by consumption of star fruit juice. The patient had never drank the star fruit juice before?  
2 What about the renal recovery when discharged from the hospital?  
3 What other treatments were administered in this patients? any oral medications?  
4 Authors are encouraged to discuss more about the mechanism of the star fruit juice induced AKI.
