COMMENTS TO AUTHORS

This is an interesting review. The authors reviewed the incidence, risk factors, outcomes, and management of retinal emboli. This review has some significance for clinicians and researchers working. However, certain sections of the manuscript would require major modifications and several issues require clarifications. 1. In this review, the author just listed the data that has been reported, lacking analysis and critical discussion. 2. Conclusions - This should state clearly the main conclusions of the review. The authors should be advised to rewrite this section. 3. References - only 3 of 32 are the last 5 years. It is advisable that 70% of the references are the last 5 years. 4. There are some linguistic errors that should be corrected.

COMMENTS TO AUTHORS

The Contribution of the paper and the Quality is Good. Resubmission of Paper with Minor Additions is to be done by comparing the works of Contributors published during the Years 2010-2014 in the proposed area, to get more understanding for additional contributions made by the authors/author.
