

**Supplementary Table 1 Subgroup analyses of association between atrial fibrillation burden > 5 min and future stroke risks with adjusted risk ratios**

Subgroup	No. of studies	Adjusted risk ratio (95%CI)	$I^2$ (%)	$P$ value for heterogeneity
With history of AF				
Yes	2	3.11 (1.75-5.52)	0	0.32
No	4	2.23 (1.48-3.35)	0	0.64
With anticoagulation therapy				
Yes	3	2.71 (1.49-4.11)	0	0.95
No	3	2.14 (1.23-3.72)	32	0.23

AF: Atrial fibrillation.
