COMMENTS TO AUTHORS

There is so much information about diagnosis criteria for PBC.If the description of diagnosis for AMAs-negative patients is prominent will better

COMMENTS TO AUTHORS

Comment to authors; Dear authors, 1- Avoid from abbreviations at abstract section. 2- Referencing from the introduction section is more appropriate, so referencing from the beginning of the introduction section and reorganization of references is recommended. 3- Five to ten key word selection is required but there are only 3 key words. 4- Text is vast, condensation should be much proper for a better understanding. 5- References section must be rearranged according to the WJG instructions for authors references section. Sincerely, 04.03.2015
