

A**B**

Supplementary Figure 1 TCGA plot tool was used to analyze the relationship between *ARPC1B* expression and MSI status, TMB of TCGA data. The results showed that *ARPC1B* had no significant association with MSI and TMB of COAD/READ. A: Comparison of *ARPC1B* mRNA expression levels between MSI. B: Comparison of *ARPC1B* mRNA expression levels between TMB. Spearman's rank correlation coefficient (r) and corresponding p-values are displayed. Statistical significance was determined by two-tailed Wilcoxon rank-sum test. ^ap < 0.05; ^bp < 0.01.
