SPECIFIC COMMENTS TO AUTHORS
1. In the summary of this article, it is described that delusional parasitosis has existed for more than one year, but in the description of the current medical history, the medical history is described as that delusional parasitosis appeared two months before the visit. The description of medical history is inconsistent. Please check and verify. 2. In the "case summary", line 13, "delusional paraptosis" is not correct, "delusional parasitosis" should be changed into "delusional parasitosis". 3. Delusional parasitosis is a kind of psychosis. Why can't it be considered that the patient is delusional parasitosis complicated with Parkinson's disease?
