

CHECKLIST OF RESPONSIBILITIES FOR SCIENTIFIC EDITORS

Manuscript NO.: 100510

Manuscript page number: 17 Rate: 6.2 CNY per page

Editing Fee: 105.4 CNY

Ethics and relevant document handling (如果作者首次修回手稿提交的伦理及相关文件, 经过科学编辑核实符合要求, 则不计算费用。如果作者首次修回手稿提交的伦理及相关文件, 经过科学编辑核实不符合要求, 经过科学编辑同作者联系沟通后, 作者最终提供了符合要求的文件, 则计算费用。单价为: 每个文件 16 元):

Audio Core Tip: CNY

Biostatistics Review Certificate: CNY

CARE Checklist-2016: CNY

Clinical Trial Registration Statement: CNY

Conflict-of-Interest Disclosure Form: CNY

CONSORT 2010 Statement: CNY

Copyright License Agreement: CNY

Approved Grant Application Form(s): CNY

Signed Informed Consent Form(s) or Document(s): CNY

Signed Consent for Treatment Form(s): CNY

Institutional Animal Care and Use Committee Approval Form: CNY

Institutional Review Board Approval Form: CNY

Non-Native Speakers of English Editing Certificate: CNY

PRISMA 2009 Checklist: CNY

STROBE Statement: CNY

The ARRIVE Guidelines: CNY

Relativities of References to the Subject of Manuscript: 16 CNY

Total Editing Fee: 121.4 CNY

Scientific Editor: Meng-Liu Luo

Date of signature: December 22, 2024 (month/day/year)

Item No.	Specific items for verification	Comments Yes=[Y] No= [N]
1	<p><i>General Information of the Manuscript</i></p> <p>Name of journal: World Journal of Gastroenterology</p> <p>Manuscript NO.: 100510</p> <p>Column: Editorial</p> <p>Title: Reflux after peroral endoscopic myotomy: The dilemma and the options</p> <p>Authors: priya hazrah</p> <p>Reviewer code: 08353502</p> <p>First decision: 2024-11-24 03:03</p>	[Y]
2	<p><i>Editorial Office's Comments</i></p> <p>Science Editor: This is an editorial about endoscopic myotomy.</p> <p>Company Editor-in-Chief: I have reviewed the Peer-Review Report, full text of the manuscript, all of which have met the basic publishing requirements of the World Journal of Gastroenterology, and the manuscript is conditionally accepted. I have sent the manuscript to the author(s) for its revision according to the Peer-Review Report, Editorial Office's comments and the Criteria for Manuscript Revision by Authors.</p>	[Y]
3	The fixed headings are copied.	[Y]
4	The title will concisely summarize the main topic of the study, being not overly long (no more than 18 words). Words such as	[Y]

	'exploration', 'research', 'analysis', 'observation', and 'investigation' are to be avoided. The title should not start with 'A', 'An', or 'The' and will not include any Arabic numbers or abbreviations.	
5	A short running title is provided (no more than 6 words).	[Y]
6	The authors' full family (sur)names and full/abbreviated first names are listed on the title page and are consistent with those listed in the signed Copyright License Agreement form.	[Y]
7	The 'Author contributions' passage describes the specific contribution(s) made by each author. The author's names are listed in the following format: full family (sur)name followed by abbreviated first and middles names. <i>e.g., "Wang CL and Liang L contributed equally to this work; Wang CL, Liang L, Fu JF, Zou CC, Hong F and Wu XM designed the research study; Wang CL, Zou CC, Hong F and Wu XM performed the research; Xue JZ and Lu JR contributed new reagents and analytic tools; Wang CL, Liang L and Fu JF analyzed the data; and Wang CL, Liang L and Fu JF wrote the manuscript. All authors have read and approve the final manuscript."</i>	[Y]
8	The 'Supported by' statement describes the source(s) of financial support and includes the corresponding identification number(s) and program ID(s) if available, and contains no spelling errors.	[N]
9	The 'Corresponding author' passage provides the corresponding author's full first and family (sur)names, abbreviated title (<i>e.g.</i> , MD, PhD), affiliated institute's name and complete postal address (including zip code) and e-mail (written in all lowercase), and contains no spelling errors.	[Y]
10	The Manuscript Tracking information (<i>i.e.</i> , Received, Revised,) are provided along with the corresponding editor and date for each item, and contain no spelling errors.	[Y]
11	The Abstract section is formatted according to the article-specific	[Y]

	<p>style (structured <i>vs</i> unstructured) and word count thresholds, as follows:</p> <p><u>Editorial, Frontier, Medical Ethics, Minireview, Review:</u> Non-structured abstract that is no more than 200 words.</p> <p><u>Field of Vision, and Letter to the Editor:</u> Non-structured abstract that is no more than 150 words.</p> <p><u>Research articles:</u> Structured abstract with subsections for BACKGROUND (no more than 100 words); AIM (no more than 20 words); METHODS (no more than 80 words); RESULTS (no more than 120 words); and CONCLUSION (no more than 26 words).</p> <p><u>Case Reports:</u> Structured abstract with subsections for BACKGROUND (no more than 80 words); CASE SUMMARY (no more than 150 words); and CONCLUSION (no more than 20 words).</p>	
12	<p>The 'Key words list' will provide 5-10 keywords that reflect the main content of the study. Please do not use abbreviations for the keywords (e.g. ulcerative colitis, not UC). The first letter of each keyword will be capitalized, and each keyword will be separated by a semicolon.</p>	[Y]
13	<p>The "citation" contains authors' names and manuscript title. The name of the first author should be typed in bold letters; the family (sur) name of all authors should be typed with the first letter capitalized, followed by their abbreviated first and middle initials. For example, an article by Jae Moon Yoon, Ki Young Son, Chun Sick Eom, Daniel Durrance, Sang Min Park will be written as Yoon JM, Son KY, Eom CS, Durrance D, Park SM. Pre-existing diabetes mellitus increases the risk of gastric cancer: A meta-analysis. <i>World J Gastroenterol</i> 2024; In press</p>	[Y]
14	<p>The Core tip is a short paragraph that is independent of the content of the Abstract. The 'Core tip' will provide a summary of the study</p>	[Y]

	that outlines the most innovative and important arguments. This section should be less than 100 words.	
15	The 'INTRODUCTION' section clearly describes the relevant background information for the study. Only the most relevant and current (within the past 5 years) literature is cited, with the exception of rare instances of seminal literature citations. All technical terms and/or abbreviations are explained and/or defined, with the full name of abbreviations given upon first appearance in the text and the abbreviation presented in parentheses [<i>i.e.</i> , "...computed tomography (CT)"]. First-person pronouns (<i>e.g.</i> , 'I', 'we') are used appropriately to clearly indicate the work performed by the author(s). When weaknesses of previous studies are described in the text to highlight the innovations related to the current study, the information is presented carefully.	[Y]
16	The 'MATERIALS AND METHODS' section clearly and accurately describes all materials and methods used to obtain the data presented in the article and is adequate for a reader to repeat the study.	[N]
17	The 'RESULTS' section concisely describes the observational and experimental results. Representative data and data that have scientific significance are emphasized. Data is presented in either the text, a table or figure (<i>i.e.</i> , chart, diagram, graph or image), but is not repeated among each. Information presented in the tables and figures clearly describes the trends, meaning, and inferences. Results described in textual form are accurate, concise and clear.	[N]
18	Statistical symbols are accurate. Statistical significance is expressed as ^a $P < 0.05$, ^b $P < 0.01$ ($P > 0.05$ usually does not need to be denoted). If there are other series of P values, ^c $P < 0.05$ and ^d $P < 0.01$ are used, and a third series of P values is expressed as ^e $P < 0.05$ and ^f $P < 0.01$. Statistical data is expressed as mean \pm SD or mean \pm SE.	[N]

19	The 'DISCUSSION' section (1) describes the main purpose and hypothesis of the study; (2) summarizes the most important results; (3) illustrates and explains the results (but does not simply repeat the data) and draws conclusions or inferences based on the results; (4) points out the limitations of the study and their impact on the results, as well as proposes further advice on future research topic(s) or direction(s); and (5) describes the theoretical significance and practical value of the findings.	[N]
20	The 'ACKNOWLEDGEMENTS' section expresses gratitude to any individuals or organizations for technical support (<i>i.e.</i> , providing instrumentation, equipment or experimental materials, and/or assistance in experimental work), non-technical services (<i>i.e.</i> , useful inspiration, suggestions, guidance, or review), and/or any other auxiliary work.	[N]
22	The 'REFERENCES' section lists the references in the Vancouver style. This style uses Arabic numeral in-text citations based on the order of the first appearance of a source in the text. For citations where the author's name is indicated in the text, a superscript number should be placed following the name (<i>i.e.</i> , "Pang <i>et al</i> ¹ "). For citations where no author is indicated, a superscript number should be placed at the end of the sentence. Respective examples are: "Ma ¹ reported", "Pan <i>et al</i> ^[2-5] indicated" ; "PCR has a high sensitivity ^[6,9] ." No superscript numbers are used when the reference number is described in the text; for example, "The experimental method used has been described in reference [8]." The style of reference citations in tables is the same as that in the text (<i>e.g.</i> , Pan <i>et al</i> ^[2-5] , please see reference [8]).	[Y]

23	References have been edited by Auto-Analyser. Journal references have been verified to ensure that there are no duplicate references and that the PMID numbers are correct. For references not yet included in PubMed: the name of Chinese journals is spelled out using Chinese Pinyin, with the first letter of each word capitalized (<i>e.g.</i> , <i>Shijie Huaren Xiaohua Zazhi</i>); the name of journals in other languages are listed according to indexing information retrieved from Google. Book references are presented with all the information relevant to the electronic version.	[Y]
24	The manuscript should appropriately acknowledge the surrounding literature for the topic. All references should be related to the subject of the manuscript and/or the context in which they are cited.	[Y]
25	The number of cited references is appropriate for the article type, as follows: <u>Commentary</u> : no less than 50; <u>Review</u> : no less than 100; <u>Article</u> : no less than 30/26; <u>Case Report and Letter to the Editor</u> : no less than 1.	[Y]
26	The ethics-related statements are provided in accordance with the manuscript type (<i>e.g.</i> , Manuscript No.-Institutional review board statement, Manuscript No.-Animal care and use statement, <i>etc.</i>).	[Y]
27	The names of the peer reviewers and the scientific editor are present at the end of the paper (<i>e.g.</i> , P-Reviewer: Hugot D S-Editor: Wang JL L-Editor: P-Editor:).	[Y]
28	The order and numerical labeling of tables and figures is consistent with their appearance and presentation in the text. Symbols in tables (<i>e.g.</i> , +, -, ×, ÷, *) correctly correspond to the definitions in the footnotes. Only one legend is provided for each multi-panel figure consisting of color graphs, black and white graphs, or line graphs	[N]

	that depicts data of the same theme. For example: Figure 1 Pathological changes in atrophic gastritis tissue before and after treatment. A: ...; B: ...; C: ...; D: ...; E: ...; F:	
29	The original figure documents have been provided. The figures have been arranged using PowerPoint to ensure that all graphs or arrows or text portions can be reprocessed. Split pictures include flow charts, line graphs, histograms, and graphs including text. Unsplit pictures include meta-analysis diagrams, PCR amplification curves, and survival curves.	[N]
30	Standard three-line tables have been provided, that is, only the top line, bottom line, and column line are displayed, while other table lines are hidden. The contents of each cell in the table should conform to the editing specifications, and the lines of each row or column of the table should be aligned.	[N]
31	The author(s) highlighted the changes made to the manuscript according to the peer-reviewers' comments.	[N]
32	The responses to the peer-reviewers' comments are consistent with the changes made to the manuscript.	[Y]
33	A <i>CrossCheck</i> investigation (an effective tool for detecting unoriginal content, enabling our editors to preserve the journal's integrity and the authors' copyright) has been performed for the manuscript <i>via</i> the website: http://www.ithenticate.com/ . The results document contains the following information for the manuscript: "Name of journal", "Manuscript No.", "Columns", "Title" and "Author list". The Figure of the <i>CrossCheck</i> results is saved in PNG format (.png) at 1440 × 680 pixel resolution. The PDF of the <i>CrossCheck</i> results has been saved under the file name: manuscript No.- <i>CrossCheck</i> report (e.g., 870- <i>CrossCheck</i> report). The Google searches have also been performed to further ensure publication of original content.	[Y]
34	The revised manuscript is provided (file name: Manuscript No.	[Y]

	<p>_Auto_Edited; e.g., 89870_Auto_Edited).</p> <p>The letter of peer-reviewers' comments is provided (file name: Manuscript No.-Peer-review(s); e.g., 870-Peer-review(s)).</p> <p>The response letter is provided (file name: Manuscript No.-answering-reviewers; e.g., 89870-answering-reviewers).</p>	
35	<p>The related ethics and relevant documents are provided, such as (1) Approved grant application form(s) or funding agency copy of any approval document(s) (file name: Manuscript No.-foundation-statement); (2) Biostatistics review certificate (file name: Manuscript No.-biostatistics-statement); (3) Conflict-of-interest statement (file name: Manuscript No.-conflict-of-interest-statement); (4) Clinical trial registration statement (file name: Manuscript No.-clinical-trial-registration-statement); (5) Institutional review board approval form or document (file name: Manuscript No.-institutional-review-board-statement); (6) Institutional animal care and use committee approval form or document (file name: Manuscript No.--institutional-animal-care-and-use-committee-statement), and (7) Signed informed consent form(s) or document(s) (file name: Manuscript No.-informed-consent-statement), etc.</p>	[Y]
36	<p>All authors signed the Copyright license agreement form online (file name: Manuscript No.-copyright-assignment; e.g., 89870-copyright-assignment).</p>	[Y]
37	<p>The language certificate provided by authors who are non-native speakers of English meets the requirements (file name: Manuscript No.-non-native-speakers; e.g., 870-non-native-speakers).</p>	[Y]
38	<p>The photos licensed in the Agreement for Use of Personal Photos are consistent with those in the paper (file name: Manuscript No.-Agreement for use of personal photos; e.g., 870-Agreement for</p>	[N]

	use of personal photos).	
39	The Editor has sent the edited manuscript to authors for proofreading.	[Y]
40	This document (Checklist of Responsibilities for Scientific Editors) has been saved under the file name: manuscript No.-Scientific editor work list (e.g., 870-Scientific editor work list).	[Y]
41	The text of the manuscript is typed in Book Antiqua font, 12 pt, with 1.5 line spacing.	[Y]
Responsibilities of scientific editors	<p>The primary responsibilities of our scientific editors include carefully editing and checking the entire manuscript and all accompanying materials for: (1) complete and comprehensive revision of the manuscript according to the reviewers' comments; (2) accuracy and authenticity of all ethical related documents; (3) errors in spelling, grammar, punctuation and wording; (4) format of each section in the manuscript; (5) suitability of tables, figures, figure data and legends; (6) accurate and appropriate presentation of symbols (e.g. +, -, ×, ÷, %, *) in tables and figures. Scientific editors are responsible for sending the edited manuscript to authors for proofreading.</p>
