**SPECIFIC COMMENTS TO AUTHORS**

The nature of the study, and the type of review is not clear. There is no significant difference between the conclusion and the core tip. The objective of this study and the authors intention is not clear and not indicated in the study. Introduction: The definition of microphallus was repeated. The statement:” The term micropenis refers to a normally formed penis that is shorter than average, while the term microphallus is used when there is an associated hypospadias.” Is not referred and it is also incorrect. “The absence of palpable testicles and penile urethra may be considered ambiguous, karyotyping should be performed, and counseling for sex developmental disorders should be accomplished [4].” The position of this fact in introduction section is inappropriate. Methods: There is no any inclusion, exclusion criteria. There are no any statistical studies done There is no mention about how many articles were valid for the study.

SPECIFIC COMMENTS TO AUTHORS
This is an interesting review paper. However, the manuscript would benefit from the following corrections/amendments: 1. Abstract: Methodology: Please give the procedure of literature review, paper selection, exclusion criteria, number of articles, and statistical methods employed. 2. Introduction: First three paragraphs explain the same theme. Please reduce the text and merge them in to one paragraph. 3. Discussion: Most of the text can be moved to introduction part. 4. Fig. 2. Please give the source of figure. 5. Table 1. Please move table 1 to Results section. 6. Fig. 3. Please give the source of figure. Please move it to Results section. 7. Table 2. Please move table 2 to Results section. 8. Etiology of Microphallus and micropenis: most of the text is repetitive and has been mentioned above. 9. Table 3: Please move table 3 to Results section. 10. Fig. 6. Please give the source of figure. Please move it to Results section. 11. ‘Consequences of Microphallus/Micropenis:’ this section should come after ‘Management…’ 12. There are a number of repetitive sentences throughout the text which should be omitted.
