SPECIFIC COMMENTS TO AUTHORS

Generally well written case report and review of the literature regarding management of a caecal lipoma. The authors reach the sensible conclusion that a limited caecectomy is an effective treatment when malignancy has been excluded. In the authors' case, the use

SPECIFIC COMMENTS TO AUTHORS

It is very interesting article. Subclinical appendicitis with Cecal lipoma is very rare. If there is operation photos, It can be included in article.

SPECIFIC COMMENTS TO AUTHORS

1. Why screening colonoscopy done before age of 50? 2. What is the size of the polyp? 3. Where are laparoscopic pictures: 4. What is the limit of your resection and why you don't excise the polyp only as you have frozen section with purse string of the

appendicular base? 5. Which type of anastomosis you did after resection? 6. "In cases where malignancy cannot be ruled out preoperatively, formal radical hemicolectomy should be made either laparoscopically or by laparotomy[12]." You can't exclude malignancy preoperatively and you depended on frozen section, this means that this Ref 12 didn't have frozen section?
