SPECIFIC COMMENTS TO AUTHORS
The article is within the scope of the journal. Although the work describes an interesting topic, it nevertheless requires improvements in order to be accepted: a) It must be structured in Introduction, Methods and materials, Results, Discussion and Conclusions. b) In the introduction it is necessary to review the state of the art. And for this, a representative bibliography must be sought. c) In the discussion, the presented work should be compared with other similar works, establishing what the limitations and advances are. d) In the conclusions, the scientific contribution of the article must be clearly established.
