### COMMENTS TO AUTHORS

This is a nice concise review. Please put all references within the body of the manuscript rather than leaving some to the conclusion.

### COMMENTS TO AUTHORS

The concise review by Morris and Wonders makes the point on the beneficial effects of exercise in individuals with lymphedema. Although literature is poor in this field, the review is well written and just summarize the few reports and concludes that slowly progressive exercise is not associated with the development or exacerbation of breast cancer-related lymphedema. No additional criticism can be done.
