6 Comparative analysis of the effectiveness of abiraterone before and after docetaxel in patients with metastatic castration-resistant prostate cancer

RajiShameem, Muhammad Saad Hamid, Kevin Xu, Shenhong Wu

Abstract

AIM: To study the efficacy and safety of abiraterone in patients with and without prior chemotherapy.

METHODS: The databases including Pubmed and abstracts presented at the American Society of Clinical Oncology (ASCO) meetings up to April 2014 were systematically searched. Eligible studies included randomized controlled trials (RCTs) in which abiraterone plus prednisone was compared to placebo plus
