

**Supplementary Figure 1 Serum GLP-1, blood urea nitrogen levels in CDAHFD-fed rats.** (A) Serum level of GLP-1 after 6 and 12 weeks of the experiment. (B) Serum blood urea nitrogen and creatinine after 6 and 12 weeks of the experiment. Data are the mean  $\pm$  SD ( $n = 6$ , A, B). Significant difference between groups determined by Student's t-test. CS, CSANFD-fed group; CD, CDAHFD-fed groups; Veh, vehicle (saline)-treated groups; DP4i, DPP4-I (vildagliptin)-treated group; ARNI, ARNI (sacubitril/valsartan)-treated group; Both, DPP4-I and ARNI-treated group; Car, carvedilol-treated group.

**Supplementary Figure 2 Systemic hemodynamics in bile duct-ligated rats.**

Mean arterial pressure and heart rate in bile duct-ligated rats at the end of experiment. Data are the mean  $\pm$  SD ( $n = 4$ ).  $^bP < 0.01$ , significant difference between groups determined by Mann–Whitney U test. Sham, sham-operated group; BDL, bile duct-ligated groups; Veh, vehicle (saline)-treated groups; DP4i, DPP4-I (vildagliptin)-treated group; ARNI, ARNI (sacubitril/valsartan)-treated group; Both, DPP4-I and ARNI-treated group.

**Supplementary Figure 3 Hepatic hydroxyproline and mRNA expression of Tgfb1 and Ctgf in bile duct-ligated rats.** (A) Hepatic content of hydroxyproline. (B) Hepatic mRNA levels of Tgfb1 and Ctgf. The mRNA expression levels were measured by qRT-PCR, and Gapdh was used as internal control. Quantitative values are indicated as fold changes to the values of BDL+Veh group (B). Data are the mean  $\pm$  SD ( $n = 4$ ). <sup>b</sup> $P < 0.01$ , significant difference between groups determined by Mann-Whitney U test. Sham, sham-operated group; BDL, bile duct-ligated groups; Veh, vehicle (saline)-treated groups; DP4i, DPP4-I (vildagliptin)-treated group; ARNI, ARNI (sacubitril/valsartan)-treated group; Both, DPP4-I and ARNI-treated group.

**Supplementary Table 1 List of primers used in q-PCR**
