Dextran sodium sulfate colitis murine model: An indispensable tool for advancing our understanding of inflammatory bowel diseases pathogenesis

Eichele DD *et al*, DSS colitis murine model

Derrick D Eichele, Kusum K Kharbanda

Abstract

Inflammatory bowel diseases (IBD), including Crohn's disease and Ulcerative colitis, are complex diseases that result from the chronic dysregulated immune response in the gastrointestinal tract. The exact etiology is not fully understood, but it is accepted that it occurs when an inappropriate aggressive inflammatory response in a genetically
