## CHECKLIST OF RESPONSIBILITIES FOR SCIENTIFIC EDITORS OF THE BAISHIDENG PUBLISHING GROUP JOURNALS

The primary responsibilities of our scientific editors include carefully checking the entire manuscript and all accompanying materials for: (1) errors in spelling, grammar, punctuation and wording; (2) suitability of tables, figures, figure data and legends; (3) accurate and appropriate presentation of symbols ( $e.g. +, -, \times, \div, \%, *$ ) in tables and figures; and (4) complete and comprehensive revision of the manuscript according to the reviewers' comments.

The information for your currently assigned manuscript and the checklist are below:

Name of journal: World Journal of Gastroenterology

Manuscript NO.: 53247 Column: Minireviews

Title: Oesophageal Atresia: The Growth Gap

Authors: Isabelle Traini, Jessica Menzies, Jennifer Hughes, Steven Thomas Leach and

Usha Krishnan

**Reviewer code:** 00503623, 02577402, and 00068720

First decision: 2019-12-30 10:16 Scientific Editor: Ze-Mao Gong Date of signature: 2020-03-05

Item no.	Specific items for verification	Comments
1	The fixed headings are copied.	[Y]
2	The title concisely summarizes the main topic of the study and is not too long	[Y]
	(no more than 12 words). Words such as 'exploration', 'research', 'analysis',	
	'observation', and 'investigation' are avoided. The title does not start with	
	'The' and does not include any Arabic numbers or uncommon abbreviations.	
3	A short running title is provided (no more than 6 words).	[Y]
4	The authors' full family (sur)names and full/abbreviated first names are listed	
	on the title page and are consistent with those listed in the signed BPG	[Y]
	Copyright License Agreement form.	

5	The 'Author contributions' passage describes the specific contribution(s) made	
	by each author. The author's names are listed in the following format: full	
	family (sur)name followed by abbreviated first and middles names.	
	e.g., "Wang CL and Liang L contributed equally to this work; Wang CL, Liang	
	L, Fu JF, Zou CC, Hong F and Wu XM designed the research study; Wang CL,	[Y]
	Zou CC, Hong F and Wu XM performed the research; Xue JZ and Lu JR	
	contributed new reagents and analytic tools; Wang CL, Liang L and Fu JF	
	analyzed the data; and Wang CL, Liang L and Fu JF wrote the manuscript. All	
	authors have read and approve the final manuscript."	
	The 'Supported by' statement describes the source(s) of financial support and	
6	includes the corresponding identification number(s) and program ID(s) if	[N]
	available, and contains no spelling errors.	
	The 'Corresponding author' passage provides the corresponding author's full	
7	first and family (sur)names, abbreviated title (e.g., MD, PhD), affiliated	[1]
7	institute's name and complete postal address (including zip code) and e-mail	[Y]
	(written in all lowercase), and contains no spelling errors.	
	The Manuscript Tracking information (i.e., Received, Peer review started, First	[Y]
8	decision, Revised, Accepted, Article in press, and Published online) are	
0	provided along with the corresponding editor and date for each item, and	
	contain no spelling errors.	
	The Abstract section is formatted according to the article-specific style	
	(structured $vs$ unstructured) and word count thresholds, as follows:	
	Commentary, Frontier, Diagnostic Advances, Medical Ethics, Minireview,	[Y]
	Review, Therapeutics Advances, and Topic Highlight: Non-structured	
9	abstract that is no less than 200 words.	
9	Field of Vision, Case Report and Letter to the Editor: Non-structured abstract	
	that is no less than 150 words.	
	Research articles: Structured abstract with subsections for AIM (no more than	
	20 words); METHODS (no less than 80 words); RESULTS (no less than 120	
	words); and CONCLUSION (no more than 26 words).

https://www.wjgnet.com

10	The 'Key words' list provides 5-10 keywords that reflect the main content of	[Y]
	the study. The first letter of each keyword is capitalized, and each keyword is	
	separated by a semicolon.	
	The "citation" contains authors' names and manuscript title. The name of the	
	first author should be typed in bold letters; the family (sur) name of all	
	authors should be typed with the first letter capitalized, followed by their	
	abbreviated first and middle initials. For example, an article by Jae Moon	F2/1
11	Yoon, Ki Young Son, Chun Sick Eom, Daniel Durrance, Sang Min Park will be	[Y]
	written as Yoon JM, Son KY, Eom CS, Durrance D, Park SM. Pre-existing	
	diabetes mellitus increases the risk of gastric cancer: A meta-analysis. World J	
	Gastroenterol 2019; In press	
	The 'Core tip' provides a summary (less than 100 words) of the study that	
12	outlines the most innovative and important arguments and core contents of	[Y]
	the paper and will serve to effectively attract readers.	
	The 'INTRODUCTION' section clearly describes the relevant background	[Y]
	information for the study. Only the most relevant and current (within the past	
	5 years) literature is cited, with the exception of rare instances of seminal	
	literature citations. All technical terms and/or abbreviations are explained	
13	and/or defined, with the full name of abbreviations given upon first	
	appearance in the text and the abbreviation presented in parentheses [i.e.,	
	"computed tomography (CT)"]. First-person pronouns (e.g., 'I', 'we') are	
	used appropriately to clearly indicate the work performed by the author(s).	
	When weaknesses of previous studies are described in the text to highlight the	
	innovations related to the current study, the information is presented	
	carefully.	
	The 'MATERIALS AND METHODS' section clearly and accurately describes	
14	all materials and methods used to obtain the data presented in the article and	[N]
	is adequate for a reader to repeat the study.	

15	The 'RESULTS' section concisely describes the observational and experimental	
	results. Representative data and data that have scientific significance are	
	emphasized. Data is presented in either the text, a table or figure (i.e., chart,	[N]
	diagram, graph or image), but is not repeated among each. Information	
	presented in the tables and figures clearly describes the trends, meaning, and	
	inferences. Results described in textual form are accurate, concise and clear.	
	Statistical symbols are accurate. Statistical significance is expressed as ${}^{\mathrm{a}}P$ <	
	0.05, $^{\rm b}P$ < 0.01 ( $P$ > 0.05 usually does not need to be denoted). If there are other	
16	series of $P$ values, $^{c}P$ < 0.05 and $^{d}P$ < 0.01 are used, and a third series of $P$	[N]
	values is expressed as $^{\rm e}P$ < 0.05 and $^{\rm f}P$ < 0.01. Statistical data is expressed as	
	mean ± SD or mean ± SE.	
	The 'DISCUSSION' section (1) describes the main purpose and hypothesis of	
	the study; (2) summarizes the most important results; (3) illustrates and	
	explains the results (but does not simply repeat the data) and draws	
17	conclusions or inferences based on the results; (4) points out the limitations of	[N]
	the study and their impact on the results, as well as proposes further advice	
	on future research topic(s) or direction(s); and (5) describes the theoretical	
	significance and practical value of the findings.	
	The 'ACKNOWLEDGEMENTS' section expresses gratitude to any individuals	
18	or organizations for technical support (i.e., providing instrumentation,	
	equipment or experimental materials, and/or assistance in experimental	[N]
	work), non-technical services (i.e., useful inspiration, suggestions, guidance, or	
	review), and/or any other auxiliary work.	
10	The 'ARTICLE HIGHLIGHTS' section provides comments for original articles	f > * 3
19	in accordance with the specified format.	[N]
	•

https://www.wjgnet.com

	The 'REFERENCES' section lists the references in the Vancouver style. This	
	style uses Arabic numeral in-text citations based on the order of the first	
	appearance of a source in the text. For citations where the author's name is	
	indicated in the text, a superscript number should be placed following the	
	name (i.e, "Pang et al"). For citations where no author is indicated, a	
20	superscript number should be placed at the end of the sentence. Respective	[Y]
	examples are: "Ma <sup>[1]</sup> reported", "Pan et al <sup>[2-5]</sup> indicated"; "PCR has a	
	high sensitivity <sup>[6,9]</sup> ." No superscript numbers are used when the reference	
	number is described in the text; for example, "The experimental method used	
	has been described in reference [8]." The style of reference citations in tables is	
	the same as that in the text (e.g., Pan et $al^{[2-5]}$ , please see reference [8]).	
	Journal references have been verified to ensure that there are no duplicate	
	references and that the PMID numbers are correct. For references not yet	
	included in PubMed: the name of Chinese journals is spelled out using	
21	Chinese Pinyin, with the first letter of each word capitalized (e.g., Shijie Huaren	[Y]
	Xiaohua Zazhi); the name of journals in other languages are listed according to	
	indexing information retrieved from Google. Book references are presented	
	with all the information relevant to the electronic version.	
	The number of cited references is appropriate for the article type, as follows:	
22	<u>Commentary:</u> no less than 50;	
	Review: no less than 100;	[N]
	Article: no less than 30/26;	
	Case Report and Letter to the Editor: no less than 1.	
23	The ethics-related statements are provided in accordance with the manuscript	
	type (e.g., Manuscript NoInstitutional review board statement, Manuscript	[Y]
	NoAnimal care and use statement, etc.).	
24	The names of the peer reviewers and the scientific editor are present at the	F2/2
	end of the paper (e.g., P-Reviewer: Hugot D S-Editor: Wang JL).	[Y]
L		

The order and numerical labeling of tables and figures is consistent with their appearance and presentation in the text. Symbols in tables (e.g., +, -, ×, *, *) correctly correspond to the definitions in the footnotes. Only one legend is provided for each multi-panel figure consisting of color graphs, black and white graphs, or line graphs that depicts data of the same theme. For example: Figure 1 Pathological changes in atrophic gastritis tissue before and after treatment. A:; B:; C:; D:; E:; F:  Split pictures include flow charts, line graphs, histograms, and graphs including text. Unsplit pictures include meta-analysis diagrams, PCR amplification curves, and survival curves.  The author(s) highlighted the changes made to the manuscript according to the peer-reviewers' comments.  The responses to the peer-reviewers' comments are consistent with the changes made to the manuscript.  The revised manuscript is provided (file name: Manuscript NoReview; e.g., 870-Review).  The letter of peer-reviewers' comments is provided (file name: Manuscript NoPeer-review(s); e.g., 870-Peer-review(s)).  The response letter is provided (file name: Manuscript NoAnswering reviewers; e.g., 870-Answering reviewers).  The related ethics and relevant documents are provided, such as (1) Approved grant application form(s) or funding agency copy of any approval document(s) (file name: Manuscript NoGrant application form(s)); (2) Biostatistics review certificate (file name: Manuscript NoBiostatistics statement); (3) Conflict-of-interest statement (file name: Manuscript NoConflict-of-interest statement); (4) Clinical trial registration statement (file name: Manuscript NoInstitutional review board approval form or document (file name: Manuscript NoInstitutional review board statement); (6) Institutional animal care and use committee approval form or document (file name: Manuscript	_

Biostatistics review certificate (file name: Manuscript NoBiostatistics statement); (3) Conflict-of-interest statement (file name: Manuscript NoConflict-of-interest statement); (4) Clinical trial registration statement (file name: Manuscript NoClinical trial registration statement); (5) Institutional review board approval form or document (file name: Manuscript NoInstitutional review board statement); (6) Institutional animal care and		grant application form(s) or funding agency copy of any approval	
statement); (3) Conflict-of-interest statement (file name: Manuscript NoConflict-of-interest statement); (4) Clinical trial registration statement (file name: Manuscript NoClinical trial registration statement); (5) Institutional review board approval form or document (file name: Manuscript NoInstitutional review board statement); (6) Institutional animal care and		document(s) (file name: Manuscript NoGrant application form(s)); (2)	
NoConflict-of-interest statement); (4) Clinical trial registration statement (file name: Manuscript NoClinical trial registration statement); (5) Institutional review board approval form or document (file name: Manuscript NoInstitutional review board statement); (6) Institutional animal care and		Biostatistics review certificate (file name: Manuscript NoBiostatistics	
NoConflict-of-interest statement); (4) Clinical trial registration statement (file name: Manuscript NoClinical trial registration statement); (5) Institutional review board approval form or document (file name: Manuscript NoInstitutional review board statement); (6) Institutional animal care and	30	statement); (3) Conflict-of-interest statement (file name: Manuscript	[ ] ]
review board approval form or document (file name: Manuscript NoInstitutional review board statement); (6) Institutional animal care and	30	NoConflict-of-interest statement); (4) Clinical trial registration statement (file	[ + ]
NoInstitutional review board statement); (6) Institutional animal care and		name: Manuscript NoClinical trial registration statement); (5) Institutional	
		review board approval form or document (file name: Manuscript	
use committee approval form or document (file name: Manuscript		NoInstitutional review board statement); (6) Institutional animal care and	
1		use committee approval form or document (file name: Manuscript	

	NoInstitutional animal care and use committee statement), and (7) Signed	
	informed consent form(s) or document(s) (file name: Manuscript	
	NoInformed consent statement).	
	All authors signed the BPG Copyright license agreement form (file name:	
31	Manuscript NoCopyright license agreement; <i>e.g.</i> , 870-Copyright license agreement).	[Y]
	The language certificate provided by authors who are non-native speakers of	
32	English meets the BPG requirements (file name: Manuscript NoLanguage certificate; <i>e.g.</i> , 870-Language certificate).	[Y]
	The photos licensed in the Agreement for Use of Personal Photos are	
33	consistent with those in the paper (file name: Manuscript NoAgreement for use of personal photos; <i>e.g.</i> , 870-Agreement for use of personal photos).	[N]
	This document (Checklist of Responsibilities for Scientific Editors) has been	
34	saved under the file name: manuscript NoScientific editor work list (e.g.,	[Y]
	870-Scientific editor work list).	
	A CrossCheck investigation (an effective tool for detecting unoriginal content,	
	enabling our editors to preserve the journal's integrity and the authors'	
	copyright) has been performed for the manuscript via the website:	
35	http://www.ithenticate.com/. The results document contains the following	
	information for the manuscript: "Name of journal", "Manuscript No.",	[Y]
	"Columns", "Title" and "Author list". The Figure of the CrossCheck results is	[ + ]
	saved in JPEG format (.jpg) at 1440 × 680 pixel resolution. The PDF of the	
	CrossCheck results has been saved under the file name: manuscript No	
	CrossCheck report (e.g., 870-CrossCheck report). The Google searches have	
	also been performed to further ensure publication of original content.	
36	The text of the manuscript is typed in Book Antiqua font, 10 pt, with 1.5 line	[Y]
	spacing.
