### COMMENTS TO AUTHORS

It would be desirable to specify: 1. Which generation of oesophagus capsule has been used in this study (Pillcam Eso 1 or 2). 2. What type of sedation was used in the patients who underwent an upper endoscopy? 3. In the praragraph "Methods" at the end of the text "non-alcoholic fatty liver disease" the acronym NAFLD should be added as it is later mentioned in the paragraph "Results". 4. In the paragraph "Results" the acronym "GFR" appears for the first time although its meaning has not been specified before. We think that it refers to Glomerular filtration rate but it should be clarified. 5. Figures 1 and 2 should be referenced in the text.
