COMMENTS TO AUTHORS

Interesting and well written review. Would suggest adding a bit more on the process and rationale of Allo-HCST since that is one of the main areas of focus in your article. The abstract reads more like an introduction. Needs a bit of modification. Important points from the studies mentioned could be summarized in a table

COMMENTS TO AUTHORS

This is a well-written review article regarding an important topic - the feasibility of stem cell transplantation for the treatment of mycosis fungoides and Sezary syndrome. The report is clinically interesting and relevant. I would suggest using a table format to summarize the recent studies regarding this topic.

COMMENTS TO AUTHORS

In this review article, the authors described the use of stem cell transplantation for the management of cutaneous T cell lymphoma. The article is clinically important and I would recommend its acceptance for publication in the World Journal of Dermatology.
