## ESPS PEER-REVIEW REPORT

**Name of journal:** World Journal of Gastroenterology

**ESPS manuscript NO:** 25180

**Title:** Advanced imaging techniques in the therapeutic response of transarterial chemoembolization for hepatocellular carcinoma

**Reviewer's code:** 00069105

**Reviewer's country:** Spain

**Science editor:** Ya-Juan Ma

**Date sent for review:** 2016-02-28 20:06

**Date reviewed:** 2016-02-29 04:47

		<input checked="" type="checkbox"/> No	

### COMMENTS TO AUTHORS

Dear authors: The review is very interesting, well written, easy to read, interesting and not very written topic, references are OK, but two main problems. 1. No figures 2. This is a classical review neither systematic review nor meta-analysis. As a classical review ia a good one but the evidence level of this type of review is low. No definition of Pubmed Search included

### COMMENTS TO AUTHORS

Well written overview of the existing modalities of imaging that can improve the assessment of post treatment response for HCC after TACE/TARE. Some parts are somewhat technical from the imaging physics and the inclusion of images will be useful for general/clinical readers
