SPECIFIC COMMENTS TO AUTHORS
This manuscript was clinical guidelines which focused on the radiotherapy in management of non-small cell cancer (NSCC). The authors reviewed indications for radiotherapy in NSCC and provided the recommendation of detailed therapeutic strategy in radiotherapy. This study was conducted well. The data are presented clearly. In general, this is a well-written paper that presents informative data. This article will be of interest to clinicians involved in this field. However, the following minor issues should be addressed: Minor 1. The authors should describe a search strategy of the literature in detail. 2. The authors presented the summary of the levels of evidence and grades of recommendation in Table 7. I recommend that the authors include them in the text as well. 3. Please fill a blank in Table 5.
