## Can Perioperative Chemotherapy for Advanced Gastric ...

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC3996248>

Mar 31, 2014 · According to current guidelines, **perioperative chemotherapy** is an integral part of the **treatment strategy** for advanced **gastric cancer**. **Randomized controlled studies** have been conducted in order to determine whether **perioperative chemotherapy** leads to **improved R0 resection rates**, fewer recurrences, and prolonged survival.

The **tumor stage** of most patients ranged from i to iii by the American Joint Committee on Cancer **tumor-node-metastasis (TNM)** staging system [39]. The trials did not differ in **preoperative stage** of tumors. Quality assessment resulted in 13 trials with a Jadad score of 2 and 2 trials with a score of 3.

## Validity of studies suggesting preoperative chemotherapy for resectable thoracic esophageal cancer: A critical appraisal of randomized trials

Giulia Manzini, Ursula Klotz, Doris Henne-Bruns, Michael Kremer

### Abstract

#### BACKGROUND

In 2015, Kidane published a Cochrane review and meta-analysis to summarise the impact of preoperative chemotherapy versus surgery alone on survival for resectable thoracic esophageal cancer. The authors concluded that preoperative chemotherapy improved overall survival (OS).

#### AIM

The aim of this article was to assess the validity of the three most powerful studies included in the Cochrane review and the meta-analysis supporting the advantage of preoperative chemotherapy and to investigate the impact of an exclusion of these three studies on the result of the meta-analysis.

#### METHODS

OS was selected as the endpoint of interest. Among the ten included papers which
