SPECIFIC COMMENTS TO AUTHORS
In my opinion, the paper is well written and has good technical components and clearly described but a rewrite is required before accept. I have some suggestions and questions.

SPECIFIC COMMENTS TO AUTHORS

This a very timely review covering a wide range of COVID-19-related liver diseases. However, the manuscript is too stereotype (see below), and is not acceptable for publication in the present form. Major points

1) The authors listed mechanically many papers. The authors should pose some conclusions at the end of each sentence.

Impact of COVID-19 on liver transplantation programs (Pages 8-10): The authors should focus on this theme, not on the general care system of COCID-19 infection.

Minor points

1) English: To be revised
2) Please add a list of abbreviations
3) Please mention clearly and briefly the impact of COVID-19 infection on screening system in CHD patients, HCC surgery, liver damage as a part of multiorgan failure.
