Changes in hindfoot alignment after total knee ... 

Aug 16, 2016 - Hindfoot alignment showed greater reliance on increasing varus of the mechanical alignment of the knee joint preoperatively (P = 0.04, p < 0.05) and postoperatively (P = 0.04, p = 0.05). The post-operative 1- and 2-year hindfoot alignment angles were 2.2° (1.2) valgus and 2.2° (1.1) valgus, respectively.

Jan 29, 2021 - Arns Patients with a deformity of the hindfoot present a particular challenge when performing total knee arthroplasty (TKA). The literature contains little information about the relationship between TKA and hindfoot alignment. This systematic review aimed to determine from both clinical and radiological studies whether TKA would alter a preoperative hindfoot deformity and whether the ...
