COMMENTS TO AUTHORS

Thank you very much for giving a chance to read your excellent review article on alternative treatments on anti-H. pylori infection. The following is my minor comments. 1. title; your ms title is a little bit unclear. How about this title. "Alterentive treatments on anti-H. pylori biotherapy" 2. The ms has too much information. Why don't you shorten your ms? Please make compact and I recommend you to reduce your references.

COMMENTS TO AUTHORS

In this excellent manuscript, Ayala et al. discusses the advances in the development of vaccine for H. pylori treatment. They also present and discuss concerning other adjuvant therapies, such as based in plants, probiotics, nutraceuticals, microorganisms, peptides and intragastric violet light irradiation. The manuscript is extremely relevant and must be accepted for publication after a minor changes. Indeed, the authors are encourage to present some figures, in order to "capture the reader's attention".

COMMENTS TO AUTHORS

1) Anti-HP effects of polysaccharides should be added 2) Description of more mechanisms could be added
